Portfolio

Professional Summary

Detail-oriented Software Engineering undergraduate with hands-on experience in full-stack web development and a solid foundation in Java, C, and C++. Passionate about backend development and system performance optimisation. A fast learner who thrives in dynamic environments, delivering clean, scalable solutions to real-world problems.

Education

BSc (Hons) Software Engineering Sri Lanka Institute of Information Technology (SLIIT) 2022 – Present

GCE Advanced Level —2022 / 2023

GCE Ordinary Level —2019

Projects

Shoe Mart Website · HTML · CSS · JavaScript · PHP

Developed a full-stack e-commerce web application for a footwear store, allowing users to browse products, view detailed product pages, and purchase shoes online through a structured shopping system.

The system includes product listing with categories, product detail pages with multiple image views, shopping cart functionality, and user account management. It also supports backend integration with a database to manage products, users, and orders efficiently.

Designed with a responsive and user-friendly interface to ensure smooth navigation and an enhanced online shopping experience across different devices.

Golden Treat · HTML · CSS · JavaScript · PHP

Developed a full-stack web-based management system for a bake house to streamline daily business operations and improve efficiency.

The system includes core modules such as order management, inventory tracking, customer record management, and sales reporting. It allows staff to handle customer orders digitally, update stock levels in real time, and maintain organized customer and sales data for better decision-making.

The application was designed with a user-friendly interface to simplify operations for non-technical users while ensuring smooth workflow between different business functions.

Hospital Management System · Java · NetBeans · MySQL

Desktop application covering patient and doctor record management, appointment scheduling, and reporting. Designed with a modular MVC structure.

Technical Skills

- ▶ **Languages:** Java, C, C++
- ▶ **Web:** HTML5, CSS3, JavaScript, PHP
- ▶ **Databases:** MySQL, MongoDB
- ▶ **IDEs:** Android Studio, Visual Studio
- ▶ **Version Control:** Git & GitHub
- ▶ **Concepts:** OOP, RESTful APIs, MVC

Soft Skills

- ▶ **Collaboration**
- ▶ **Problem Solving**
- ▶ **Attention to Detail**
- ▶ **Adaptability**

Extra-Curricular Activities

Tennis — *Asian Tennis Federation*

- ▶ Ranked 27th, Week 1 Tournament — Asian Tennis Federation
- ▶ Ranked 28th, Week 2 Tournament — Asian Tennis Federation
- ▶ Championship winner — Queen's Club
